

OCCON goes for new technology

OCCON will re-launch its procurement platform www.occon.net completely new. To achieve this, the new mark-up language used will be HTML 5. Thereby the platform's flexibility will be enhanced. The launch of the new version ACE 3.0 is planned for the second quarter of 2015.

Ludwigshafen, Germany, 05 February 2015.

In addition to an improved performance and flexibility, as well as extended possibilities of use, the new version will stand out with a process-oriented arrangement of all current functions. As all admin-functions will be available directly via the particular ACE, the detour via today's admin platform NEXT2B will be eliminated.

Moreover, it will then be possible to switch from one ACE into another, e.g. from SEA to ROAD, during one session. In future, there will only be one login area - purchaser and supplier will be differentiated automatically.
